

It is three weeks before our September 17, 2016 Open House. The skeleton is complete. John Billone and others under his direction are wiring the balance of the track. He advised that all of the track will be wired to run trains at our first Open House. Everyone attending the first Open House will be able to see the intricacies that go into layout building. As members, all of us can be proud of the crew that is putting together one of the best O-Gage 3-rail layouts in the Midwest, if not the country.

Key points are that the track has been positioned and is currently being secured. The protective Plexiglas frames are in place and the Plexiglas is cut to be inserted after the work in this area is completed. Kevin Barry is finishing up on the outdoor movie theater, which plays current and era movies. Steve Goshko is working with Al Havlicek on laying out the finishing touches on updating the Belt-Line layout complete with a new GRAND PASSENGER STATION. We look forward to seeing our neighbors September 17, 2016 at our first Open House which will show our new layout at its beginnings.

Mark and Swav check the Plexiglas framework

Members take a look at what has been accomplished

Kevin setting up the Outdoor Theater

Swav tacking down track

Ed is measuring for the new Station

Steve securing decking

Jeff wiring track
