Welcome To The New Year, Part II

February 2020

I continue to share our accomplishments that we have made over the last few years, where the CLRC landscaping team has done a superb job in making our layout very realistic and enjoyable.

Many thanks to Bill Weigt, Steve Goshko, Tom Zeglicz, Jeff Mills, Bill Herrndobler, Tom McGrath, Joe Oster, Joe Smolinski, Tom Mott, Herb Koch, John Billone, Mark Fears, Roger Keller and I am sure there are more. Please let me know if I overlooked anyone and I will add them to this list.

This month I am going to highlight many of these vignettes, structures, scenes, and dioramas, that have been created out of the minds and imagination of our members. They are highly detailed and museum quality. Look at these pictures of our member's efforts. Use it as a list to search where each one is located, like a scavenger hunt. Some are easy, some take a while and some intensified searching to find. Try it out the next time you are at our Train House. We may put a scavenger hunt together for our next Open House February 18, 2020.

By the way, our next club car will be ready in October. It is an orange Santa Fe PS-1 Box Car. Only 100 cars are on order. Look at our website, www.clrcrains.com for more information.

Dave Lerner and I have made a CLRC video of his State Set. Dave is mighty proud of his set and is worthwhile to view at www.clrcrains.com
