The Chicago Public Library is always looking to partner up with local organizations for various displays and other coordinated activities. **Kevin Barry** listened to the staff at the Bessie Coleman Branch, located at 721 E. 63<sup>rd</sup> Street, Chicago, IL. They needed a static display for the summer reading program entitled “Explore on the Go” which lent itself very nicely to all forms of transportation. **Kevin** was asked to add his creativity in developing the display, housed in a nice glass case. Two levels of trains with aircraft and other vehicles were cleverly placed to support the theme. The third level from the top was an F-3 Amtrak engine and train going through a mountain tunnel. On the bottom level contained a Cow and Calf C & NW switcher and a variety of freight cars. The Children's Librarian supplemented the display with books about trains.

**Kevin** was told that the display tied in the reality of trains with the opportunity to read the books on display and others in the Library.
